

1 Full Array of Bus Networking Products

Mission Critical Reliability - no other bus network can match the reliability of a FieldLink solution.

- A complete bus networking solution from Master/Gateways and Power Supplies to I/O Modules and Cabling
- Drop leg switching and short circuit protection
- Current-limited power supplies
- Corrosion-resistant, fully sealed components (NEMA 4, 4X & 6 rated)

2

Hazardous Area Compliance

FieldLink components are rated for use in the most severe process environments.

- Suitable for use in explosion-proof, nonincendive, power limited or intrinsically safe applications
- FM & CSA approvals for Class I & II hazardous areas
- NEC expertise and reference tools

3

Local Integrator Support

We realize you'll settle for nothing less than around-the-clock support.

- Network design assistance
- 24/7 local integrator back up
- Training and commissioning support

We know that the right bus networking solution is one that's optimized to meet the requirements of your specific operation. For process plants, that solution is FieldLink™, the only system designed exclusively to support your unique bus networking requirements. Whether you're working in hazardous and corrosive environments or benign general purpose areas, interfacing with discrete or analog field instruments, connecting to an existing DCS or PLC system, or installing a new control architecture, we've got the right components, know-how and support to put the network together for you.
